Algorithm:-

START

1. Set $N \leftarrow 1$
2. IF $N > 10$, go to step 12.
3. IF $N \text{ MOD } 3 = 0$, go to step 10.
4. Set $I \leftarrow 1$.
5. ~~Print~~ Product = $N * I$
6. Print $N * I = \text{Product}$
7. Set $I \leftarrow I + 1$
8. IF $I \leq 10$, go to step 06.
9. Set $N \leftarrow N + 1$
10. Go to step 03.
11. END

Pseudo code :-

Begin

Let $N \leftarrow 1$

While ($N \leq 10$), do

IF $N \text{ MOD } 3 \neq 0$, then

$I \leftarrow 1$

While ($I \leq 10$), do

product $\leftarrow N * I$

print $N, "x", I, "=", \text{Product}$

$I \leftarrow I + 1$

END While

END IF

$N \leftarrow N + 1$

END While

END
